Enable project-based security

Inheritance Strategy

Inherit permissions from parent ACL

This item will inherit its parent item's permissions (in addition to any permissions granted here). If this item is at the top level in Jenkins, it will inherit the [global security security settings](#).

| User/group | Credentials | | Job | | | | | | | Run | | SCM | | | | |
|------------|---------------|--------|------|-------|--------|-----------|--------|----------|------|------|-----------|--------|--------|--------|-----|--|

Throttle builds

Build Triggers

- Build after other projects are built
- Build periodically
- Generic Webhook Trigger
- GitHub hook trigger for GITScm polling
- Poll SCM
- Quiet period
- Trigger builds remotely (e.g., from scripts)
